<https://smartlib.ueh.edu.vn/>

# Learning Resource

## Lectures/Tutorials

Lectures are specific topics focusing on critical issues and real world practical application of the content. Lectures are not simply a regurgitation of the textbook content. Sometimes there may be information presented in lectures that is not covered in the textbook - this information is examinable.

It is helpful if students have completed the required readings prior to viewing lecture resources on the E-learning system and in hard copies (if provided) as this assists in students' ability to engage with the materials. If, for some reasons, students are unable to complete required readings in a specific week, students must still view the resources and try to catch up on students' readings as soon as possible afterwards. Any such information is examinable, so it will definitely be beneficial to view all lecture resources.

Tutorials following the lectures provide students the opportunity to apply and share knowledge by doing a variety of in-class activities individually or in group such as exercises, discussions, and presentations. These activities focus on demonstrating students' skills and help students build the ability to achieve the learning outcomes for each unit.

Tutorial questions/exercises will be provided in class. Students will be expected to complete specific readings and exercises from the textbooks and other required materials prior to attending each lecture and tutorial class. If students do not prepare adequately, students will not get the full benefits from this learning opportunity.

## Assignment Coversheet and Peer Evaluation Form

All assignments are to be submitted with an Assignment Cover Sheet, either with an individual or group assignment coversheet. In addition, group assignments are to be submitted with a Student Evaluation of Group Member Form. These forms can be found in the Student Forms section at <http://myisb.isb.edu.vn/>

## Unit Guide

The unit guide is a document that contains all the basic information about a unit, including lecturer name and contact information, learning outcomes, learning resources, and the detailed schedule of teaching/learning activities.

The unit guide also has a detailed description of what will be expected as a student in the course and how students will be assessed. Students should use the unit guide as a resource throughout the duration of the unit and refer back to it for any questions. A soft-copy of the unit guide will be available on the E-learning system one week before the commencement of the class.

## Textbooks

Students will find out the prescribed textbook(s) for each unit from the unit guide. In most cases, students will be required to pay an additional fee for the required textbooks. It is students' responsibility to find out what books they need for each unit and to make sure they have a copy by the first day of class.

## Extra Materials

Extra materials (including PowerPoint slides, lecture notes, etc.) for each unit will be available at least one week before the first session starts on the E-learning site. Students are required to access to <http://e-learning.isb.edu.vn/> to prepare carefully for the upcoming classes.

Students are also required to access the university's E-library to search for journal articles and other materials to prepare for their assignments. Other sources of unauthorized papers are not encouraged since they may lead to unethical behaviors, resulting in grade reduction for the assignments.

## Academic Assessment

Students' performance will be evaluated in a progress by a set of assessment tasks which are transparently indicated in the Unit Outline and Learning Guide at the beginning of each unit. The total mark is the average mark weighted by proportion of each assessment task in a unit. The final examination usually accounts for highest percentage.

Assessment tasks could be attendance, individual assignment, group assignment, seminar, mid-term examination, and Final examination which are stated clearly in the Unit Guide.

Some units have threshold requirement which leads to grade of fail if students violate, even though the total mark could be higher than 5.0.

Students will face to mark deduction or even receiving a grade of Zero (0) if they violate academic dishonesty such as cheating and plagiarism.

GPA standing for Grade Point Average is the average grade of all units in an award, weighted by the credit points of each unit. It is calculated as follows

$$GPA = \frac{\sum_{i=1}^n G_i \times c_i}{\sum_{i=1}^n c_i}$$

with

$G_i$  : Total mark of Unit i

$c_i$  : Credit points of Unit i

$\sum_{i=1}^n c_i$  : Total number of credit points accumulated in an award

**Note:** GPA for graduation will not include Physical Education subjects and Military Course. However, students are required to complete Physical Education subjects and Military Course in order to graduate.

## Late Submission of Assessment

Coursework and assignments are expected to be completed within the stated time frame. No late assignments will be accepted unless prior authorization is granted by the coordinator. In case such an authorization is not granted, grade deduction will be applied. The coordinator may decide not to accept assignments that are not submitted within 3 days after the assignment due date. However, if there are extenuating or unforeseen circumstances, an exception may be granted at the discretion of the unit coordinator and based on a Special Consideration Application for assessment task extension.

All quizzes and the final exam must be taken on the assigned dates. If there are extenuating or unforeseen circumstances, the unit coordinator must be contacted prior to the quiz or exam dates to authorize a make-up if required. No make-up quiz or exam will be accepted unless a prior approval is granted by the unit coordinator based on a Special Consideration Application for a supplementary examination.

If a student is struggling to maintain a certain academic standard, ISB may intervene in a number of ways including limiting the number and type of classes that student can take. In some cases, ISB may ask that student to take a leave of absence from the University, or expel the student from the University altogether.

Class attendance is compulsory and students should provide reasons and supporting evidence for the failure to attend the class on a particular lecture/workshop session.

Students are required to attend a minimum number of all classes, according to the subject syllabus in order to secure assessment marks and qualify to sit the final exam.

## University differs from High school

The University recognizes that many students suffer from being inadaptable to the University environment after graduating high school. Therefore, the UEH-ISB expects all students to perceive that:

- The learning outcomes in the University are resulted not only from the lecturers but also the students. The satisfied learning outcomes come from the harmonious combination of students' strong motivation for pursuit, awareness of self-directed learning, and good facilitators.
- Unlike the high school environment, performance in the University is assessed basing on Academic, Skills, and Attitude. Students should actively participate in teams, groups, or any activities of the University besides academic study.
- Students should learn how to effectively work in a team or group. Being selfish and shy are not encouraged in the University. The more you share your knowledge with your friends and lecturers, the more comprehension you achieve.
- Students should learn how to effectively employ the University facilities including E-learning and library.
- Students should seek advice from the Student Service or learn from other students.
- Students should put themselves in the connection to the University community. The more relationship you can set the more success you will achieve after.
- Students should familiarize themselves with actively updating the University information from all resources including E-learning, school website, and notice board instead of waiting for the news to come.

## How to Achieve Good Performance

- Familiarize yourselves with the University's policies on Assessment and Examinations;
- Ensure you read and understand the assessment requirements;
- Actively participate in class;
- Note the due dates and methods for submission of assignments provided in the Learning Guide, seeking clarification from the lecturers or Unit Coordinators if required;
- Actively engage with the learning activities and resources provided in your units and by the University to help you prepare your assessment tasks;
- Follow the lecturers' guidelines and instructions for format and submission of assignments;
- When enrolling in a unit after teaching has commenced, obtain the relevant information on assessments in the unit from the Unit Coordinator.
- Seek advice if you have a disability or chronic health condition, or acquire one during your course, to ensure that you can meet any inherent requirements of the units.

## How to Avoid Losing Marks

- Undertake all assessment tasks ethically;
- Submit on time your work;
- Collect all marked assessment tasks in sufficient time to learn from the feedback provided;
- Ensure to understand the requirements, including timetables, for assessment tasks.

## Email Etiquette

Your lecturers receive many emails each day. In order to enable them to respond to your emails appropriately and in a timely fashion, students are asked to follow the basic requirements of professional communication.

Firstly, all emails should have a concise and descriptive title, including the class and name of the unit you are enquiring about as your lecturers may be teaching more than one unit/class.

Students need to be clear about the intention of their emails, use appropriate tone and language, proofread what is written in the email before sending it. Students should also allow 3-4 working days for a response before following up. If the matter is legitimately urgent, you may indicate this in the email subject header but be sure that the email does require an immediate response before using this strategy. If your email request is complex and requires a lengthy response it may be probably best to make an appointment with your lecturers to meet in person.
