Learning resources

Unit Guide

The unit guide is a document that contains all the basic information about a unit, including lecturer name and contact information, learning outcomes, learning resources and the detailed schedule of teaching/learning activities. The unit guide also has a detailed description of what will be expected as a student in the course and how students will be assessed. Students should use the unit guide as a resource throughout the duration of the unit and refer back to it for any questions. A soft-copy of the unit guide will be available on the E-learning system one week before the commencement of the class.

Lectures/Tutorials

Lectures will examine specific topics focusing on critical issues and real world practical application of the content. Lectures are not simply a regurgitation of the textbook content. Sometimes there may be information presented in lectures that is not covered in the textbook - this information is examinable.

It is helpful if students have completed the required reading prior to viewing lecture resources on the E-learning system and in hard copies (if provided) as this assists in students' ability to engage with the material. If, for some reasons, students are unable to complete required readings in a specific week, students must still view the resources and try to catch up on students' reading as soon as possible afterwards. Any such information is examinable, so it definitely will be beneficial to view all lecture resources.

Tutorials following provide students to apply and share doing a variety of activities individually such as exercises presentation. The focus on demonstrate students' skills and build the ability to learning outcomes

Tutorial questions be provided in class be expected to have specific reading from the textbook required material attending each lecture tutorial class. If students prepared adequately will not get the full this learning opportunity

All assignments are to be submitted with an Assignment Cover Sheet, either with an individual or group assignment coversheet. In addition, group assignments are to be submitted with a Student Evaluation of Group Member Form. These forms can be found in the Student forms section at <http://myisb.isb.edu.vn/>

Extra materials

Extra materials (including power point, lecture notes, etc.) for each unit will be available at least one week before the first session starts on E-learning site. Students are required to access to <http://elearning.isb.edu.vn/> to prepare carefully for the upcoming classes.

Students are also required to access the university's E-library to search for journal articles and other materials to prepare for their assignments. Other sources of unauthorized papers are not encouraged since they may lead to unethical behaviors, resulting in grade reduction for the assignments.

The University recognizes that many students suffer from being inadaptable to the University environment after graduating high school. Therefore, the UEH-ISB expects all students perceive that:

The learning outcome in the University is resulted not only from the lecturer but also the student. The satisfied learning outcome comes from the harmonious combination of student's strong motivation for pursuit, awareness of self-directed learning and good facilitators.

Unlike high school environment, performance in University is assessed basing on Academic, Skills and Attitude. Students should actively participate in team, group or any activities of the University besides academic study.

Students should learn how to effectively work in a team or group. Being selfish and shy are not encouraged in the University. The more you share your knowledge to your friends and lecturers, the more comprehension you achieve.

Students should learn how to effectively employ the University facilities including e-learning and library.

Students should seek advice from the Student Service or learn from other students.

Students should put themselves in the connection to the University community. The more relationship you can set the more success you will achieve after.

Students should be familiarize themselves with actively updating the University information from all resource including E-learning, school website and notice board instead of waiting for the news comes.

Four years of Bachelor Award will fly in a moment, try to enjoy and use this great opportunity to accumulate knowledge and mature your personality.

How to achieve good performance

- Familiarize yourselves with the University's policies on Assessment and Examinations;
- Ensure you read and understand the assessment requirements;
- Actively participate in class;
- Note the due dates and methods for submission of assignments provided in the Learning Guide, seeking clarification from the lecturers or Unit Coordinator if required;
- Actively engage with the learning activities and resources provided in your units and by the University to help you prepare your assessment tasks;
- Follow the lecturer's guidelines and instructions for format and submission of assignments;
- When enrolling in a unit after teaching has commenced, to obtain the relevant information on assessments in the unit from the Unit Coordinator.
- Seek advice if you have a disability or chronic health condition, or acquire one during your course, to ensure that you can meet any inherent requirements of the unit.

How to avoid losing marks

- Undertake all assessment tasks ethically;
- Submit, on time your own individual work;
- Collect all marked assessment tasks in sufficient time to learn from the feedback provided;
- Ensure to understand the requirements, including timetables, for assessment tasks.

Email etiquette

Your teachers receive many emails each day. In order to enable them to respond to your emails appropriately and in a timely fashion, students are asked to follow basic requirements of professional communication.

Firstly, all emails should have a concise and descriptive title, including the class and name of the unit you are enquiring about as your teacher may be teaching more than one unit/class.

Students need to be clear about the intention of their emails, use appropriate tone and language, proof-read what is written in the email before sending it. Students should also allow 3-4 working days for a response before following up. If the matter is legitimately urgent, you may indicate this in the email subject header but be sure that the email does require an immediate response before using this strategy. If your email request is complex and requires a lengthy response it may be probably best to make an appointment with your teacher to meet in person.
